EDUCATION

Bachelor of Science in Computer Science · Minor in Mathematics · Seam Honors Pathway
University of Kentucky · Lexington, Kentucky

August 2019 - May 2023
Cumulative GPA: 4.0

EXPERIENCE

Senior Software Engineer · 84.51° · Cincinnati, Ohio

June 2023 - Present

- Designing and implementing scalable data pipelines in Snowflake, transforming and delivering supply chain data to over 50 customers, growing adoption from fewer than 10.
- Developing and maintaining customer-facing Java Spring API and Svelte UI, enabling seamless data access and improved user experience.
- Leading the development of the Client Management Service API, leveraging Java Spring and Snowpark to automate client onboarding, contract processing, and subaccount creation.
- Architecting and launching the Custom Data Orders experience, empowering customers with greater flexibility in selecting metrics and aggregations compared to traditional syndicated data offerings.

Salesforce Technician · University of Kentucky Transformative Learning · Lexington, Kentucky

August 2021 – May 2023

- Designed and implemented a UI tool for the organization that booked thousands of coaching appointments
- Maintained back-end systems within the Salesforce for error-free use by the organization

Software Engineer Intern · JPMorgan Chase · Columbus, Ohio

June 2022 – August 2022

- Programmed a chatbot using Rasa framework to answer FAQs and assist users with application support
- Created microservices using Java Spring framework to retrieve data from an API endpoint and store in an Oracle DB

Application Development Intern · Total Quality Logistics · Cincinnati, Ohio

January 2022 – May 2022

- Developed in-house WinForms app using the .NET tech stack that allowed employees to manage over 10k loads a day
 - Wrote stored procedures and queries in SQL for manipulation and retrieval of company data in databases
-

SKILLS

- **Software Development and Architecture:** Java (Spring Boot), Javascript (React, Angular, Svelte), State Management (NgRx, Svelte Stores), Python, SQL
 - **Cloud, Data, & Infrastructure:** Snowflake (Snowpark, ETL pipelines), Azure (Functions, Cosmos DB, App Services, DevOps), PostgreSQL, CI/CD (GitHub Actions, Azure DevOps), and testing (JUnit, Mockito, Jest, Playwright)
 - **Personal:** Technical leadership, Event planning, Object-oriented programming, Agile methodology, Lean System Certified
-

PROJECTS

NKY Connect

- Developed NKY Connect, a React-based web platform hosted in Azure, connecting customers with local service providers in Northern Kentucky, with plans for expansion.
- Built and deployed a scalable Azure Functions API backed by Cosmos DB for listings, customer interactions, and growth.

NKY Pickleball League Website · <https://www.nkypickleballleague.com/>

- Created and manage a pickleball league website using Carrd that allowed the league to enhance its engagement and expand participation beyond only family and friends
-

INVOLVEMENT

Leader · 84.51° In The Know

November 2023 – November 2024

- Organized and facilitated the widely attended "Ask the Execs" session, moderating discussions with the CEO and executive leadership to address employee-submitted questions.
- Managed end-to-end event logistics, including speaker coordination, technical support, and hybrid accessibility, ensuring smooth execution of both virtual and in-person sessions.
